Engineering Problem-Solving

101 focuses on actual problem-solving techniques used by engineers in practice, not in theory. It identifies, describes, discusses, and presents illustrative examples of the use of the wide variety of tested techniques real-world engineers have employed in practice for centuries. Typically, students are immersed in problems with no prior training in problem-solving. Many never learn though and fail or bail out of engineering.

Solving Energy Problems. The culminating energy project is introduced and the technical problem solving process is applied to get students started on the project. By the end of the class, students should have a good perspective on what they have already learned and what they still need to learn to complete the project.
