healing from eating disorders. It encourages individuals to bring awareness to their body and sensations, identify and address unresolved issues through the use of role-playing, guided imagery, use of props, dance and yoga therapies and much more [1].

Experiential Therapies for Bulimia Nervosa Treatment

Art Expression. As a visual language, art is a powerful means of expression for patients with eating disorders. Art Therapy helps them tap into their creative and authentic selves, and gives them comfort and a powerful tool for expressing the shape of their feelings and how they perceive their physical self. The artwork patients create over the course of their stay with EDCare also provides a

Art therapy, music therapy, dance and movement therapy, drama therapy, creative writing, meditation, equine therapy – these are some examples of recent trends in eating disorders treatment. These types of “expressive therapies” can be useful in uncovering feelings, images, and sensations and may permit greater freedom of expression in patients who have difficulty with verbal communication of feelings or for those with impaired cognitive insight.
