Making Sense of Communities of Practice in Global Health. June 29, 2020 by Neil Pakenham-Walsh Leave a reply. 'A community of practice is a group of people who share a concern or a passion for something they do, and learn how to do it better as they interact regularly.'. We define Communities of Practice (CoPs) in global health as open, inclusive, virtual spaces (discussion forums) that bring together people who share a concern or a passion for global health.

Health has become a policy issue of global concern. Worried that the unstructured, polycentric, and pluralist nature of global health governance is undermining the ability to serve emergent global public health interests, some commentators are calling for a more systematic institutional response to the "global health crisis." Yet global health is a complex and uncertain policy issue. This article uses narrative analysis to explore how actors deal with these complexities and how ...
