...

The term self-preserving is more appropriate than preservative-free for most aqueous products containing a chemical system that kills microorganisms and/or prevents their growth. In other words, nearly all of the time water-based 'preservative-free' products contain a preservative - just not one recognised by the EU.

and Self-Preserving ...

Self-preservation is a behavior or set of behaviors that ensures the survival of an organism. It is universal among all living organisms. [citation needed] Pain and fear are integral parts of this mechanism. Pain motivates the individual to withdraw from damaging situations, to protect a damaged body part while it heals, and to avoid similar experiences in the future.

Preserving Cosmetics And
Self-preservation - Wikipedia
Cocoa butter has a self-
preserving effect because it is
solid at room temperature, which
makes it difficult for bacteria to
flourish. And honey has
antimicrobial, antiseptic and anti-
fungal properties, all of which
make it an excellent natural
preservative.
